

EVALUATING ALTERATIONS: Aircraft Electronics Association Seminar

Many "field approvals" are requested because the installer is unsure which alterations are major and which are minor. Valuable repair station resources are wasted on "just-in-case" field approvals and improper documentation practices. This seminar focuses on the tools necessary to evaluate an alteration for determining its effect on the aircraft.

Directions: From I-26 East, take exit 53, turn right onto Upward Rd., go about 1/2 mile, turn right onto S. Allen Drive, go about 4/10 mile to BRCC sign on left, turn left at sign onto College Drive. Continue past Sink Bldg (first on right) past the pond, to the parking area past the Patton Bldg. Seminar in Patton Bldg. Room 150.
